## Technical Data Sheet

### NorthQuest 161 (PCA)

**NorthQuest 161** polymer combines features of both Phosphonates and Polyacrylates to deliver a unique balance of threshold inhibition and dispersion. This product is resistant to chlorine and compatible with most microbiological control agents. NQ161 is a highly effective scale control agent and dispersant used primarily in boilers and industrial cleaning. It effectively disperses particulate matter such as silt and clay and eliminates the need for phosphonates and acrylate polymers in many formulations. The product is nonfoaming and has good environmental acceptability. CAS# 71050-62-9
